**To:** FEC Public Records <[pubrec@fec.gov](mailto:pubrec@fec.gov)>  
**Subject:** Comments for "REG 2023-02 Artificial Intelligence in Campaign Ads"

Dear ,

**Attached is a CSV file with names of people who urge you to create regulations and a ban**

**on deepfake technology to protect election integrity.**

The need to regulate deepfakes and other deceptive uses of AI in election ads becomes more urgent with each passing day. Please take action against the growing threat that unregulated AI poses to our democracy. The American people need the FEC to take the next step to protect the integrity of our elections from the severe threat of deepfakes being used by federal candidates and political parties to confuse or mislead voters.

Respectfully,  
MoveOn members
